

Dear Colleagues,

We would like to kindly invite you to participate in our Survey on barriers and opportunities for investment in energy-efficient street lighting. The survey targets owners, operators, contractors, and finance providers of street lighting infrastructure in the EU countries, as well as experts working on financing energy efficiency. The survey is available here: <https://ec.europa.eu/eusurvey/runner/FinancingDynamicLight2017> . We would very much appreciate if you could complete the survey by 15 April 2017.

The research is a part of the Dynamic Light project <<http://www.interreg-central.eu/Content.Node/Dynamic-Light.html>> , which aims to promote dynamic, intelligent and energy-efficient lighting and your survey response will help us better understand, identify and suggest suitable models to finance it. The project is supported by INTERREG Central Europe Programme <<http://www.interreg-central.eu/Content.Node/home.html>> . The results of the survey will serve as a basis for project deliverables, which will be freely available on our project website and in other resources. Individual responses will be treated confidentially and presented in an anonymous and aggregated format. If there will be any pieces of individual responses, which we will want to refer to, we will contact you separately for this. We will acknowledge all individuals and organizations responded to the survey, who would like to be included in our acknowledgment. Your participation in the survey does not constitute any commitment or obligation on your part.

We would be grateful if you forward our invitation to other relevant experts from your network. Please do not hesitate to contact us if you have any questions.

Yours sincerely,

Aleksandra Novikova
