

SUSTAINABLE TRANSFORMATION FOR RESILIENT COASTAL CITY

UBC Joint Planning & Sustainable Cities Commissions Seminar
September 9th-12th, 2024 | Gdańsk, Poland

Dear UBC Colleagues,

I would like to invite you to the UBC Joint Planning and Sustainable Cities Commissions Seminar titled “Sustainable Transformation for a Resilient Coastal City”, which will take place on September 9-12, 2024, in Gdańsk, Poland.

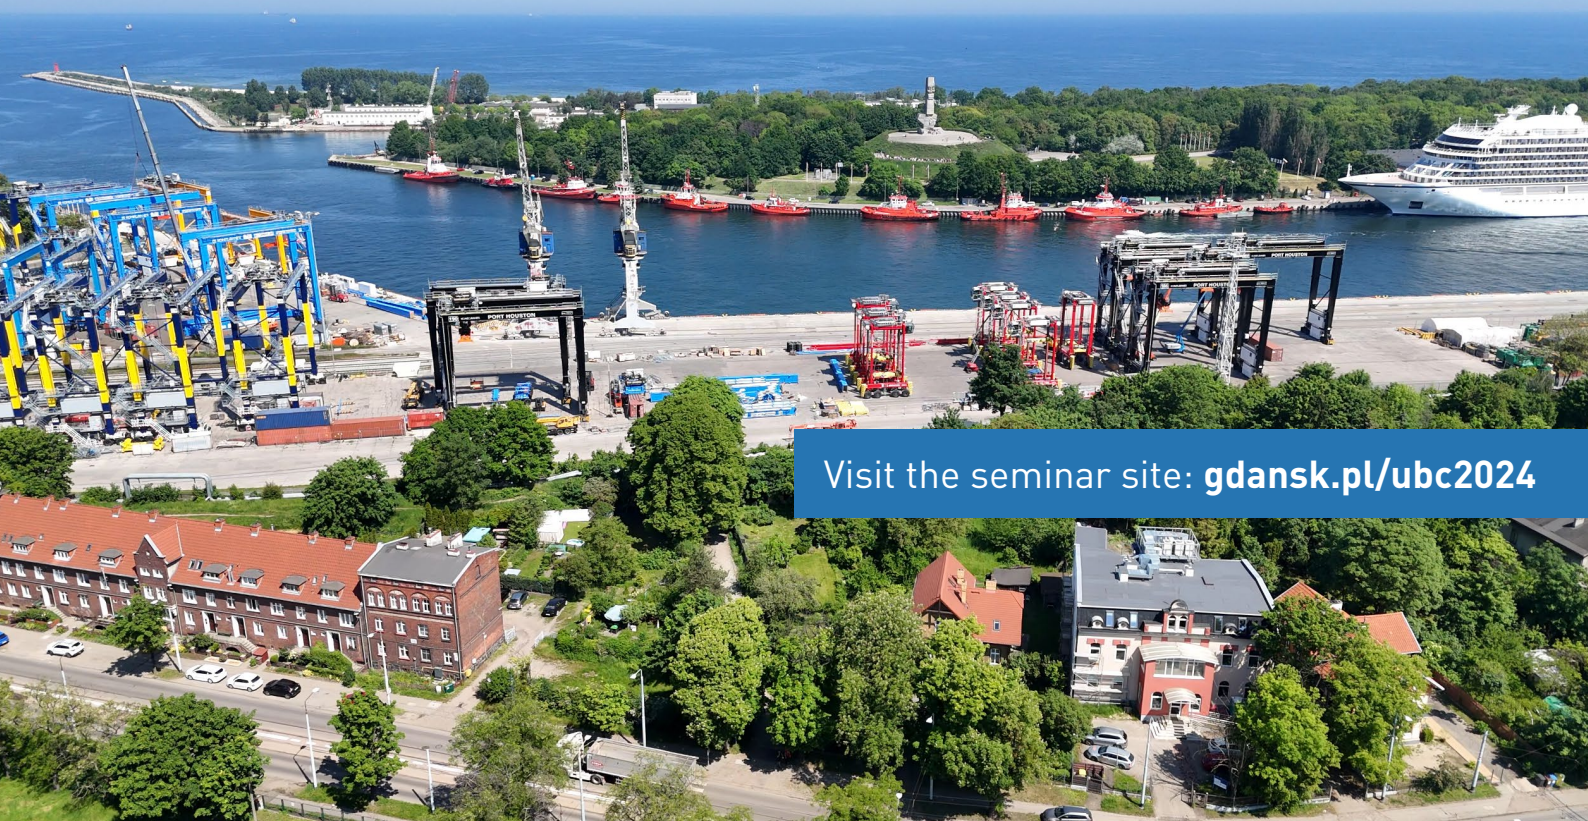

Gdańsk, with its rich maritime heritage and a population of nearly half a million, serves as a major centre for activity, science, culture, and tourism. Following the compact city concept, Gdańsk is dedicated to enhancing its urban spaces close to the city centre. The city’s development strategy focuses on creating greener, more inclusive, and accessible public areas through innovative and adaptive approaches.

Over four days, we will enjoy lectures, engaging study visits, and intensive workshop, all aimed at discussing the revitalisation of case port and industrial areas from multiple perspectives. Your presence will enrich our conversations and contribute to developing sustainable and innovative solutions for urban renewal in Gdańsk. I look forward to meeting you and hope you will enjoy this upcoming event.

Sincerely,

Piotr Grzelak

Deputy Mayor for Sustainable Development
and Investment, City of Gdansk,
