

08.11.2016 - 15:00 to 16:15

Venue: Arcade

Taking care of tomorrow. The seminar will focus on involving young people in the discussion as well as politicians from local and regional level in the Baltic Sea Region (including representatives from Norway).

An added value to the Strategy Forum is including a bottom-up perspective on the Baltic Sea Region Vision 2030. This includes a sustainable and a green future and prosperity, growth and jobs from a youth perspective. The seminar will raise the voice of the young people of the Baltic Sea Region and bring their views and proposals into the discussion on Baltic Sea Region Vision 2030.

Young persons are more sensitive to many questions - and through the way they live and communicate they are very aware of changes taking place in the society. This workshop will bring the voice of the young people of the Baltic Sea Region – their views and expertise - into the dialog on preparing the Region for the future. The focus will be on “Moving and deciding quicker with the help of youth!”, and the workshop will touch upon issues such as:

- Governance – involving and including young people
- Prosperity – empowering the youth, youth entrepreneurship, youth employment, keep young talents in the region
- The environment – how to secure a sustainable future for the next generations
