Baltic Sea Region advancing towards sustainable urban mobility planning

The Baltic Sea Region Competence Centre on SUMP brings together the knowledge and good examples of sustainable urban mobility planning from the Baltic Sea Region. The aim of the competence centre is to assist cities in developing their SUMP by giving information and support, facilitating exchange of knowledge and experiences as well as offering training opportunities. The [Good Examples database](#) collects SUMP related cases from around the region and is one of the services provided by the competence centre.

Latest

Citizen and stakeholder participation a crucial part of the SUMP process in Tartu

The city of Tartu prepared a sustainable urban mobility plan (SUMP) as a part of the Bustrip project. During the preparation process, Tartu carried out stakeholder cooperation seminars and working groups.
