

The Commission on Health and Social Affairs

Action Plan 2013

According to the agreement of the UBC Board, The City of Elbląg presides the works of UBC Commission on Health and Social Affairs. Hereby we would like to present the UBC Board action plan for the year 2013.

In the previous two years we managed to achieve main goal which was reactivation of the commission. More and more cities show interest in our activities, other UBC commissions perceive us as partners for possible collaboration.

For the next 2013 year we plan to continue our activity connected particularly with:

- increasing awareness of contemporary health and social problems in local authorities and society as a whole,
- promoting and supporting UBC member cities projects related to health and social issues,
- cooperation with other UBC Commissions and external organizations in the field of health and social issues.

Regarding the fact that 2013 is the year of the UBC General Conference in Mariehamn, in upcoming year we intend to organize one meeting of the commission in spring in Tartu, Estonia under working subject: "Community care in social and medical aspects".

During this meeting we plan to conduct a survey among participants evaluating hitherto activities and asking about expectations and suggestions connected with future ways of cities' collaboration on the platform of the commission.

The outcome of this research will be presented during meeting of the commission in Mariehamn with subsequent discussion on resultant conclusions among participants.

Taking all above into consideration we would like to propose following plan of work for this year:

- 1) Spring 2013 - Meeting of the UBC Commission on Health and Social Affairs in Tartu
- 2) Autumn 2013 - Meeting of the UBC Commission on Health and Social Affairs in Mariehamn during UBC General Conference.

Wojciech Drozd
