RUSSIA | St. Petersburg | 2020

II International Municipal BRICS Forum

November 5-6

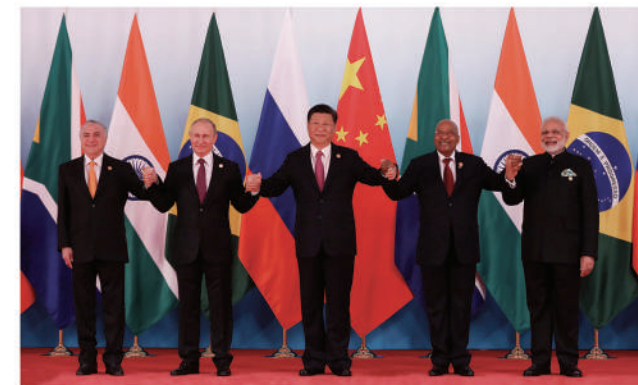

BRICS Interstate Association

BRICS is an international community created in 2006, which includes the Federative Republic of Brazil, the Russian Federation, the People's Republic of China, the Republic of India and the Republic of South Africa (since 2010). The association was created on the initiative of Vladimir Putin, the President of the Russian Federation.

The BRICS influence on the international arena is based on the growing economic might of the member states, their importance as one of the main driving forces of the global economic development, a large population and vast natural resources. The relations between the BRICS countries are based on the UN Charter, the universally recognized principles and norms of international law, as well as such principles as openness, pragmatism, solidarity, non-block nature and non-aggression with regard to third parties.

The formats of interaction among the BRICS members include regular annual summits, meetings of leaders on the margins of G20 summits, meetings of national security advisers, meetings of ministers. Contacts between city administrations, business, academic and scientific communities and civil society were established.

IX BRICS Summit, 2017, Xiamen, China.

XI BRICS Summit, 2019, Brasilia, Brazil.

BRICS Interstate Association

An important practical result of the BRICS countries' cooperation was the launch of the New Development Bank (NDB) and the BRICS Contingent Reserve Arrangement with an impressive volume of funds of USD 200 bln, which is not only solid financial support for the group but also the evidence of its greater weight in the international economy and finance. The first NDB regional office was opened in Johannesburg, South Africa. NDB is now headquartered in Shanghai, China. In 2019, another branch opened in São Paulo, Brazil. The economy of the BRICS countries has grown 4.2 times in 10 years, while the economic indicators of developed countries have increased by only 61%.

IMBRICS FORUM History

International Municipal BRICS Forum is an annual business event within the framework of the International Municipal BRICS Cooperation Project.

The forum was first held in September 2019 on the initiative of the Kupchino municipality (St Petersburg, Russia) with the support of the Ministry of Foreign Affairs of the Russian Federation.

Within the framework of the IMBRICS Forum's business program, 20 working sessions were held. The program was aimed at discussing variety of issues relevant to municipalities in the field of social and economic development. The events of the IMBRICS FORUM'2019 were widely covered in Russian and foreign media.

IMBRICS FORUM History

The forum was attended by politicians, city mayors, speakers of regional parliaments, representatives of local governments, business and academia, and public experts from Brazil, Russia, India, China and South Africa.

The results of the forum showed the relevance of the development of international cooperation at the regional and municipal levels and the need to deepen foreign economic and humanitarian ties within the framework of the project.

The organizing committee for the preparation and conduction of the International Municipal BRICS Forum concluded agreements on cooperation and representation with municipal authorities, commercial and non-profit organizations of the Five countries.

II International Municipal BRICS Forum

November 5-6

The Forum is supported by:

Ministry
of Foreign Affairs
of the Russian Federation

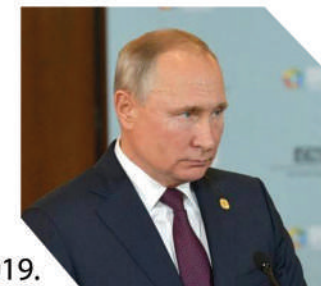

Government
of St. Petersburg

Federal Agency
Rossotrudnichestvo

“The main objective of cooperation between the BRICS member countries, as we see it, is to deliver real benefits for people and help improve living standards and the quality of life.”

Brasilia, Brazil, November 14, 2019.

Vladimir Putin,
President of the Russian Federation

Sergey Ryabkov,

Deputy Minister
of Foreign Affairs
of the Russian Federation,
Sherpa of Russia in BRICS

Dear friends!

I cordially welcome the organizers and participants of the first International Municipal BRICS Forum and the first International Rugby-7 Tournament among the municipal teams from the BRICS countries in St. Petersburg! The dialogue at the municipal level of the member states plays an important role in the growing variety of areas of cooperation between the five countries. Dialogue contributes to the establishment of new and strengthening existing contacts, and the development of interpersonal communication – the most important sphere of interaction within BRICS. I am pleased to note that the initiative to hold the Forum and the Tournament is truly public, launched at the initiative of the municipality Kupchino of St. Petersburg. It reflects a real need for the establishment of sustainable linkages between small and medium-sized urban municipalities in the BRICS countries. The agenda of the International Municipal BRICS Forum is very rich. The experience exchange in the field of urbanism, the discussion of economic prospects, the territorial and cultural potential of municipalities create extensive opportunities for discussion, as well as the potential for practical cooperation.

I would also like to note the sports component of the forum. Its unique rugby component reflects the BRICS team spirit and collective approach to achieving its goals. I am convinced that your communication will be constructive, and the final result will allow us to establish mutually beneficial contacts and launch new joint initiatives. This is especially important in the light of Russia's forthcoming chairmanship of the BRICS organization in 2020.

I wish you all fruitful work and all the best! To athletes and all spectators – new victories!

IMBRICS Forum'2020

www.imbrics.com

The Forum is supported by:

Eleonora Mitrofanova,
Head of the Federal Agency
Rossotrudnichestvo

Dear friends!

On behalf of the Rossotrudnichestvo, I am pleased to welcome the organizers, participants and guests of the International Municipal BRICS Forum. BRICS is a unique conversational format of the five largest and fastest growing countries of the world. It is not only a club that aims to further economic agency of the five countries but also a radically new form of international dialogue based on the principles of polycentricity, non-hierarchical system and networking.

International Municipal BRICS Forum promotes development of multilateral partnership, establishment of a shared space for the member countries at the municipal level. Such platform creates an opportunity to solidify friendly and twin-city relations, exchange of best municipal practices among Brazil, Russia, India, China and the Republic of South Africa. Just before Russia assumes the presidency of this alliance, the twin-city movement comes into sharp focus. Interchange of accumulated experience and achievements in international municipal collaboration contributes to the further development of all five countries of the group.

I am certain that this event will become an efficient platform for the interaction of the BRICS municipalities. I wish the forum members fruitful work, interesting discussions and useful meetings.

Oleg Melnitchenko,
Chairman of the Federation Council Committee on Federal
Structure, Regional Policy, Local Governments and Northern
Affairs

On behalf of the Federation Council Committee on Federal Structure, Regional Policy, Local Self-Government and Northern Affairs and on my own behalf, I welcome the participants and organizers of the first International Municipal BRICS Forum.

The idea of developing cooperation between the BRICS municipalities as a new form of interaction between municipalities, civil communities and public organizations of our countries in a variety of areas, primarily in the field of humanitarian and cultural cooperation, is very promising and deserves support. Despite all the differences in the structure of local self-governments, the BRICS countries have accumulated significant positive experience in addressing issues of local importance in the interests of citizens. I am convinced that the best examples of such experience will be useful for studying and implementing in the improvement and development of national systems of local self-government, taking into account the principle of preserving national traditions, national and cultural identity and features that are inherent in the peoples of our countries.

The forum's events are a great opportunity not only to explore existing practices but also to offer fresh ideas and new cooperation projects. I am certain that the forum's events will be held in a friendly, constructive and creative atmosphere, will help the municipalities and municipal communities of our countries to solve their tasks more effectively in the interests of their citizens, and will also contribute to the development of people's diplomacy. I wish the participants and organizers of the International Municipal BRICS Forum successful and fruitful work!

The Forum is supported by:

Alexander Bugaev,

Head of the Federal Agency
for Youth Affairs
(Rosmolodezh)

Evgeny Grigoryev,

Member of the government of St. Petersburg -
Chairman of the Committee
for External Affairs of St. Petersburg

Dear friends!

On behalf of the Federal Agency for Youth Affairs, I am pleased to welcome the participants, guests and organizers of the International Municipal BRICS Forum.

This year's event is held for the first time and brings together young politicians, representatives of large business communities, international associations and public non-profit organizations ready to build long-term relations in terms of municipal cooperation of the BRICS countries and the formation of a positive image of the Russian Federation among the younger generation of other countries. I am certain that this forum will help young people find opportunities for self-realization, the establishment of professional and friendly relationships, as well as for active pastime.

I wish you fruitful work, new ideas, discoveries, interesting meetings and high achievements!

Ladies and gentlemen! Dear friends!

On behalf of the government of St. Petersburg, I welcome the organizers, participants and guests of the International Municipal BRICS Forum! It is symbolic that the BRICS organization (originally BRIC) was founded in our city - within the framework of the St. Petersburg International Economic Forum in June 2006. And now, here, on the banks of the Neva river, it takes a new turn and strengthens contacts at the level of municipalities.

The government of St. Petersburg welcomes and supports the initiative of the organizers. We are convinced that through this forum we will be able to exchange experience and establish cooperation in the field of urban management, business, tourism, culture, education, science and information technology. Cooperation at the level of municipalities allows us to be as close as possible to the issues that most acutely concern our citizens and reflect the interests of everyone.

As you know, 42% of the world's population lives in the BRICS countries. Our countries produce 27% of the world's GDP and occupy 1/4 of the land area. This is a powerful resource and opportunity, and we, without a doubt, should use them as efficiently as possible. Within BRICS, our states build their relations on the principles of equality, strict consideration for each others' interests, mutual respect and openness to the outside world.

On the part of the government of St. Petersburg, we are ready for full cooperation, and we will continue to promote contacts between city administrations, business, academic and scientific communities, and civil society. I wish all participants interesting discussions and useful networking!

BRICS

RUSSIA | St. Petersburg | 2020

II International Municipal BRICS Forum

November 5-6

IMBRICS FORUM'2020 (The "BRICS Plus" format)

Official event within the framework of Russia's Chairmanship in BRICS

The forum is included in the official events calendar of the Russian Federation's BRICS chairmanship in 2020. The forum will be held in the BRICS Plus format. It will be attended not only by the BRICS representatives, but also by delegates from the SCO, the European Union, South America, the African continent, and others.

At the IMBRICS FORUM plenary meeting, high-ranking speakers will discuss the results of the outgoing year and the work on strengthening the interstate association accomplished as part of Russia's BRICS chairmanship, as well as the regional and municipal authorities.

IMBRICS FORUM'2020 (The "BRICS Plus" format)

The event's objectives:

Building international multidisciplinary interaction between municipalities, deepening the integration processes of the BRICS countries

Attracting private foreign capital in investment projects of the Russian municipalities, aimed at sustainable development of territories

Analysis and presentation of the best innovations in the field of municipal management and development of small towns in the BRICS countries

Creating a positive image of the Russian Federation abroad

Developing foreign economic and humanitarian cooperation of the BRICS countries at the regional and municipal levels

Mikhail Cherepanov,

Chairman of the Organizing Committee for the preparation and conduction of the International Municipal BRICS Forum

The development of municipal cooperation among the interstate association of BRICS is a promising direction which, due to the efficiency of interaction between small and medium-sized cities of the "Five", will allow municipalities to form the agenda that contributes to BRICS achieving a leadership position in the geopolitical arena.

The IMBRICS FORUM is a platform that creates opportunities for a broad multi-disciplinary partnership and achieving sustainable development of the territories of municipalities within the interstate association in many areas, such as economy and business, investment, scientific and digital technologies, infrastructure and transport, construction, agriculture, ecology, culture and education, sports, tourism, and humanitarian cooperation.

It is worth noting that we are working hard to find and present investment projects of Russian municipalities focused on sustainable development of territories. I am convinced that if medium-sized and small cities themselves can attract investment in the development of their economies, it will be a powerful impetus for the socio-economic development of the entire country! Thanks to our productive work at the forum, we will be able to create a pool of such investment projects that are interesting for investment by both Russian and foreign private capital.

IMBRICS FORUM'2020 (The "BRICS Plus" format)

New business contacts and connections

On the margins of the IMBRICS FORUM'2020, entrepreneurs will be able to establish new business contacts and sales markets for their products, build proper communication with potential business partners and government representatives. In turn, the BRICS municipalities will present their achievements in socio-economic, technological and innovative development, and exchange experience in building mutually beneficial integration processes.

Multidisciplinary business program

The main business program of the forum consists of 36 sections and is focused on discussing topical issues for regions and municipalities in the field of economic development, trade, investment, construction and modernization of urban infrastructure, urbanism, digitalization and innovative technologies, ecology, waste disposal and recycling, agriculture, tourism, culture and education, sports, humanitarian cooperation and social design.

Congress of Governors

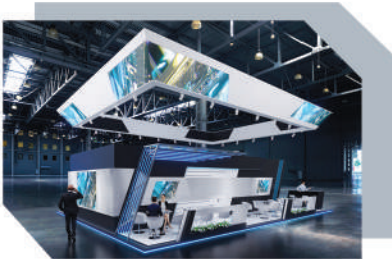

Within the framework of the IMBRICS FORUM'2020, a separate platform will be organized for regional leaders of the BRICS countries, where they will consider the best practices in implementing national projects, issues of applying effective management mechanisms that contribute to the growth of economic indicators and improvement of the quality of life.

IMBRICS FORUM'2020 (The "BRICS Plus" format)

Partnership opportunities

Partner of the IMBRICS FORUM' 2020 is a prestigious status that not only provides for premium participation and broad branding on the forum site, but also meets the strategic interests of the company/organization. A line of exclusive offers has been developed for the forum partners, which includes advertising, a stand or a module of the company/organization, holding of a presentation or a press conference, forming your own agenda within the forum and organizing a specialized working session of the company/organization.

Interactive exhibition space

The "Expoforum" Convention and Exhibition Centre site is the largest not only in St Petersburg, but also in the entire northwest Russia. It allows exhibitors to create any working space, simulate meeting rooms, exhibition stands and modules, place advertising banners, structures and LED-panels.

High media coverage

Media coverage and information support for the IMBRICS FORUM events (Russian and foreign media) will make the participation of partners and guests of the forum as noticeable as possible, win the attention of a wide audience, improve the company's image, or personal political status. Press conferences and signing ceremonies will be organized at the IMBRICS FORUM sites (both for forum partners and for heads of regions and municipalities of the BRICS countries).

Municipal Agenda of the IMBRICS FORUM'2020

In view of Russia assuming the BRICS presidency in 2020, the Organizing Committee on preparation and conduction of the IMBRICS FORUM plans to hold a separate session dedicated to the presentation of municipal investment projects aimed at sustainable development of territories of the Russian Federation at "Expoforum". They will be considered by the invited foreign investors interested in investing in small and medium-sized businesses.

With that in mind, the Organizing Committee for the preparation and conduction of the IMBRICS FORUM invites Russian regions and municipalities to present their investment projects at the forum site, and also guarantees transaction support in the event of an agreement with an investor.

The following types of projects are considered:

-  project at the zero stage: the idea of an investment project that requires an injection of funds for the preparation of documentation and further implementation;
-  project at the structuring stage: presentation of the investment project, existence of a business plan, preliminary calculations, i.e. the project is in the process of preparation;
-  turnkey project: an investment project with ready-made documentation, necessary approvals and permits, implementation dates and calculations, etc.

All investment projects should be focused on sustainable development of the territory, infrastructure development, increasing tax revenues to the budget, increasing jobs and improving other indicators of socio-economic growth.
