Direct information from Ukrainian cities

Kharkiv

- Medical equipment - CT scanner, artificial lung ventilation device, magnetic resonance imaging, neonatal incubators, physical therapy equipment
- Equipment for emergency services - ambulances, buses, cars for transporting disabled people
- power generators (from 25 to 300 kW)
- Notebooks for schools
- Starlinks for crucial infrastructure
- Portable radio stations

Other forms of assistance

Products that meet basic needs, as well as trench candles, bedding, medical supplies...

Production of the trench candles as well as camouflage nets (from fishing nets) by volunteers became some kind of social movement in which a lot of people are involved, devoting their free time to their production.

Children are very willing to help.

By the way, it is a way to forget for a moment about what is going on around and gain the feeling of helping people at the front, often very close ones.

Trench candle

carpentry construction clamp

40x40 – 60x60x0,5 mm
production of camouflage
nets
